Why worry about Lacey?

THE BAD NEWS

It's a scary new world out there. Under the recently amended Lacey Act, it is possible for *innocent* buyers to be subject to imprisonment, civil and criminal fines up to \$200,000, and forfeiture of goods. Even a simple typo on an import declaration could cost you two hundred and fifty dollars.

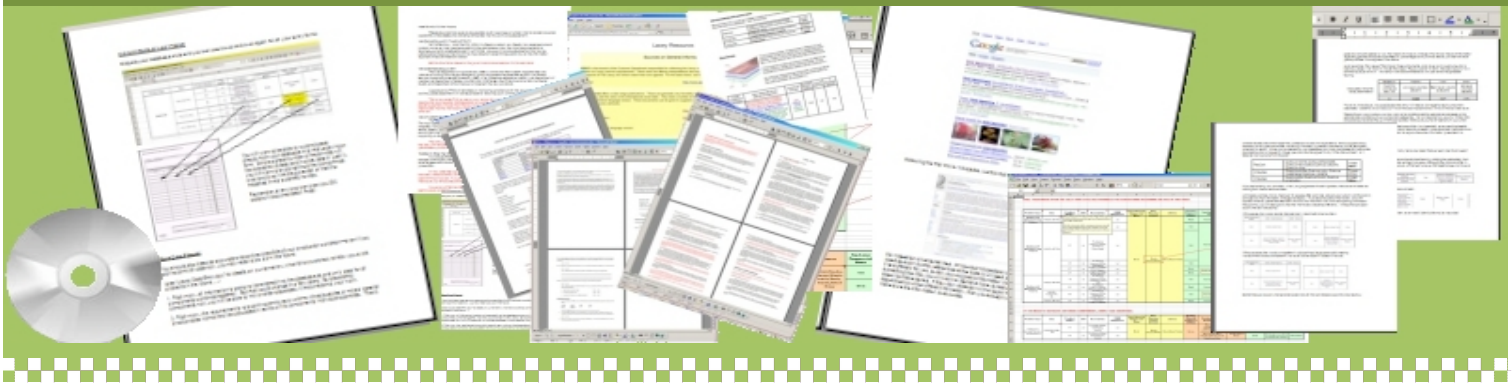

THE GOOD NEWS

A bit of due diligence on your part can reduce or mitigate potential penalties as well as significantly diminish your overall risk of being the target of an investigation. And while taking the first step may seem overwhelming and daunting, there is help. **Complying with the Lacey Act: A Real-World Guide** provides practical, step-by-step instructions to help you to organize and manage your documentation, and coordinate your internal and external communications.

The Guide—complete with sample databases and documentation—will assist you in preparing for the necessary import declarations; in learning how to document the legality of your product; and in educating yourself, your staff, suppliers and customers regarding the potential impact of the Lacey Act. Also included with the printed guide is a CD ROM containing assorted templates and documentation with recommendations for your use with domestic customers and international partners, and a reference file linking you directly to online resources. The Guide even includes tips to help reduce the risk of that pesky typo costing you again and again.
